Subject: Gold King and Sunnyside Workings and Drill Holes Map
[GoldKing_Sunnyside_DrillHoles.pdf](#)

Here is a map showing the Gold King workings and Sunnyside Workings, including drill holes. The drill information has no dip azimuth information. So, I measured everything in plan view along a horizontal plane. So essentially this is worst case scenario. The actual distance between Gold King 7 and the drill hole are almost surely farther.

Let me know if you have any more questions.

Distance = 370 feet to Sunnyside drill hole from Gold King 7
